01

Project

OVERVIEW

One streamer, one wild man, and a chase about being watched.

I Am Not Kua Fu is a VR immersive narrative game whose only narrative interface is a first-person livestream. You put on a headset and are dropped straight into Xiao K's stream: a forest in 2050, an ordinary shoot — until a mysterious "wild man" walks into the frame. From then on, everything that happens is watched by the platform, the audience and the algorithm at once.

It continues the VR method built in *Chinese Immortals*: that 14-minute piece used 20,000 photographs to scan folk shrines and let the audience walk among them. Here the audience is put inside a machine that is already broadcasting — the headset is the machine, the lens is the player's eye.

It begins with an ordinary shoot. Xiao K rides a motorbike through the hills chasing a wild man that keeps growing: you type a signature catchphrase, you copy its gestures, and voice and movement establish a resonance between you.

But when the sun comes back out the resonance breaks — it only follows the sun, until on the coast it unfolds into the giant who "descends as Kua Fu".

You then switch to Agent B, tasked with stopping the creature code-named Kua Fu before it reaches the city: kill, or wound? The body part you hit changes everything that follows. Once subdued, Kua Fu is taken to a containment centre converted from a vast dry dock. The military and an entertainment conglomerate argue over its commercial value; the compromise is to let it do one trial broadcast. Xiao K, now a major influencer, becomes its "admin".

After that you decide whether to make Kua Fu perform something grotesque and exaggerated on camera. That choice opens four endings: Entertainment to Death, Learned Helplessness, So Close, and Back to the Wild.

> Kua Fu chasing the sun is a myth about pursuing something unreachable. In the game, what is chased becomes traffic, spectacle and other people's attention — and every viewer takes part in Kua Fu's growth.

GENRE	VR immersive narrative game
PLATFORM	VR · mainstream headsets (standalone / PC VR)
POV	First person · livestream camera
SETTING	2050 · a coastal city
STRUCTURE	Four chapters + four endings
MECHANICS	Motorbike chase / catchphrase-and-gesture resonance / kill-or-wound decision / trial broadcast staging / hidden MR-glasses operation / branching endings
STAGE	In development — world, script, storyboards, character design and UI complete
TEAM	NoJinx Studio · Zhou Fang, Yan Weiqi, Yang Jingwei

02

Story

FOUR CHAPTERS · FOUR ENDINGS

CH.01

Prologue · The Chase

A forest livestream; a wild man walks into frame. Xiao K rides out after it — you type a catchphrase, copy its gestures, and the resonance slows it down. Then the sun breaks through, the resonance snaps, and it runs on toward the sun until, on the coast, it unfolds into the giant that "descends as Kua Fu".

CH.02

Control

B is sent to stop a creature code-named Kua Fu from entering the city. Kill it, or wound it? Which part you hit decides what it can still do afterwards.

CH.03

The Argument

The military and an entertainment conglomerate argue over whether to keep squeezing commercial value out of it. The compromise: one trial broadcast. Xiao K becomes its admin.

CH.04

Broadcast

The first broadcast. You decide whether to make Kua Fu perform something grotesque for the camera — and that decides which road you take.

Four Endings

5.1 — 5.4

5.1

Entertainment to Death

Traffic above all. The two sides sign a long-term deal: retire the real Kua Fu, put a virtual one on stage. It is hit by a rocket from the chat and EMOJI pour out; in reality it is anaesthetised and driven away.

> To see what really happened, remember how you put the MR glasses on in the prologue — and reverse it.

5.2

Learned Helplessness

The broadcast fails and Kua Fu is contained. B conspires with Xiao K to set it free — but if Xiao K fed it on schedule every day, then on the night of the escape it hears the dinner bell and sits down to eat.

> The better you control it, the less you can save it.

5.3

So Close

The escape begins. B and Xiao K must work together to get it out of the dry dock; one mistake and both are arrested.

> Two points of view, one body.

5.4

Back to the Wild

The two lead it back to the old forest. As the sun sets, Kua Fu fades away.

> The price is turning it back into a legend.

FIG.02 Prologue: the streaming room inside a trailer.

FIG.03 The chase: the livestream HUD.

FIG.04 Control: the scope.

FIG.01 Entertainment to Death: the city plaza, balloons and livestream billboards rising together.

03 World & Characters

DESIGN

Character design starts from orthographic sheets. Kua Fu is a huge body under pale fur with a single antler; but the face is not a god's — brow, beard and lowered eyes belong to a tired middle-aged man. Divinity and embarrassment share one face.

Xiao K grew out of the livestream: bleached buzz cut, tiger-print tee, tattooed arms. He is not the hero; he is the one who found the hero.

FIG.05 Kua Fu · turnaround. Pale fur, antler, bare feet; front, side and back.

FIG.09 Xiao K · final costume.

FIG.10 Agent B · turnaround.

FIG.07 Wild-man camp staff · character sheet.

MR Glasses

MR 眼镜

Augmented-reality glasses from a future entertainment company: the same thing looks different to different people. The essential device of the "everything livestream".

Kua Fu

夸父

A humanoid creature whose size changes with sunlight. Some research suggests its size may also track how much attention humans pay to it.

Resonance

共振

Affected by Xiao K's voice, Kua Fu can't help imitating his movements when it hears certain tones. Direct sunlight breaks the link, and it turns back to the sun.

04 Interface & Process

METHOD

The streaming HUD is not decoration; it is how the player understands the world. Viewer counts, gifts, danger warnings, navigation — every piece of information is a cue and a pressure at once. The busier the interface, the harder it is to tell whether you are operating, or being operated. In VR it is no longer a layer in front of your eyes but a space around you: danmaku drift past your ear, gifts explode overhead. So it is rebuilt from the information hierarchy of real livestream products: danmaku left, gifts and rankings right, status on top, input at the bottom.

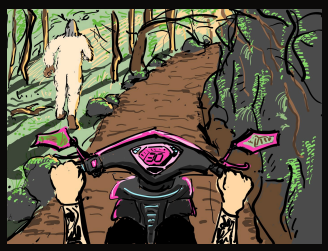

Storyboards run on two tracks: hand-drawn boards lock the staging and the mood, image generation previews light, texture and lens, and the 3D build settles it. The hesitation of the drawing and the over-clarity of the render are both kept, until they resolve into a single light.

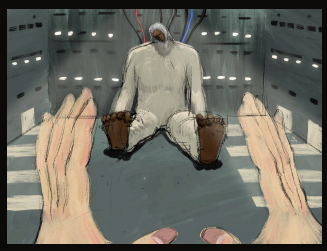

FIG.13 UI sheet: layouts for stream metrics, audience sentiment, the gift system and containment status.

01 Trailer

03 Chase

06 Interception

08 Ending

COMPLETED	World and script outline · 8 storyboard sequences (hand-drawn and AI-previsualised) · main character turnarounds and concept design · 2 level maps · 4 UI layout sets · teaser
IN PROGRESS	3D environments and real-time interactive sequences; the player-side prototype of the livestream HUD

Team

NOJINX STUDIO

NoJinx Studio 不信邪工作室

Three people, three crafts — image, algorithm, edit — pressed into one livestream.

ZF

Zhou Fang

周昉

Art Direction · Lead Artist

Leads the visual direction, the world and the flow design. A doctoral candidate at the Central Academy of Fine Arts, artist and curator whose work has shown at Annecy, the Pingyao International Photography Festival and Aesthetica; he holds the world, the storyboards, the characters and the interface of this livestream together.

YW

Yan Weiqi

严未圻

Lead Programmer

Harbin Institute of Technology · Computer Science · BSc / MSc

Owns the code architecture and works with the team on level design, gameplay design and story adjustments. He holds a bachelor's and a master's degree in Computer Science and Technology from Harbin Institute of Technology, and worked as an AI algorithm engineer before building the Unity game *Border Lurker* on his own. He crossed to the other side of the screen: he used to make algorithms judge people; now he is building a game about how algorithms watch them.

YJ

Yang Jingwei

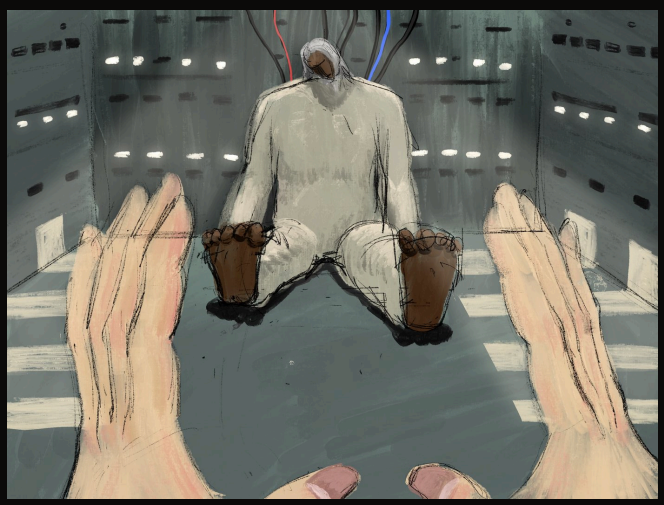

杨经纬

Music & Sound · Gameplay

Handles gameplay design, music, film and promotion. Previously an audio-video editor, he made the sound design for *Reincarnation*; a heavy gamer who reads a chase through the rhythm of a cut.

BOARD 05 The Argument: two sides in a boardroom.

BOARD 06 Control: the dive and the scope.

NoJinx Studio (不信邪工作室) is an independent three-person collective that treats a game as a shared site for image, code and sound. *I Am Not Kua Fu* is made by the three of them: Zhou Fang holds the visual and narrative structure, Yan Weiqi the systems and the code, Yang Jingwei the sound, the moving image and the outward voice.

Education

2014–2018 CAFA · Product Design · BA

2021–2024 CAFA · Fine Arts (Photography) · MA

2026– CAFA · Fine Arts · Doctoral candidate

16	17	22
EXHIBITIONS	FESTIVALS	AWARDS

He holds a BA and an MA from the Central Academy of Fine Arts and is now a doctoral candidate there, researching the language of moving images and new media, and the relation between traditional and contemporary visual art. He teaches in the Digital Media Art programme at Gengdan Institute of Beijing University of Technology, serves as a curator at Hanyi Art Museum, and is a member of the art collective THE PAINTING HOUSE©.

His practice spans photography, digital imaging and new media, exploring the collisions, transformations and fusions between traditional Chinese culture and modern civilisation. His work has been shown at the Annecy International Animation Film Festival, the Chengdu Contemporary Image Museum and the Seoul Independent Animation Festival, among others. Awards include Best VR Film at Aesthetica Film Festival (UK), the Kunpeng Award at the Pingyao International Photography Festival, and honours from the Asian Pioneer Photographer Awards, Student World Impact Film Festival, the 1839 Photography Award and The Alpine Fellowship.

Before *I Am Not Kua Fu*, his moving-image practice ran along three lines: *Reincarnation*, which rebuilt a Chinese hell with CG; *Chinese Immortals*, a VR work made from 20,000 photographs of shrines; and *Live Stream*, which read the oriental garden as a livestream set. These three methods — 3D construction, photogrammetry, screen spectacle — converge in *I Am Not Kua Fu* as one structure of looking. The VR line is pushed further: the audience no longer only sees these shrines — it is placed inside a world that is already broadcasting.

> "I don't want my work to become a purely visual show, but a reflection of reality."
>
> — Director's statement, *Reincarnation*, 2022

LIVE STREAM *Live Stream*, 2023, single-screen video, 4K, 2′20″. The audience is absent; so is the streamer.

07

Selected Works

2022 — 2025

2022

Reincarnation

轮回

Humanity takes over hell, abolishes physical punishment and builds a painless reincarnation machine — and the six realms are deformed by that intervention. Every character model was sculpted by the artist from temple murals and sculpture.

CG animation · 4′11″ · variable size
Official selection, Annecy IAFF 2023

2025

Chinese Immortals

仙儿

Some 20,000 photographs turned into 3D-scanned shrines, threading a story about immortals who descend to earth to find work — each must find a statue to inhabit, as graduates must find a place.

VR short film · 14′16″ · PICO / Quest
2025 Best VR Film, Aesthetica
2024 Kunpeng Award, Pingyao

2023

Live Stream

直播间

The audience is always absent; so is the streamer under the spotlight, leaving only a symbol for entertainment. The set is drawn from an understanding of the oriental garden — an artificial landscape built to be looked at.

Single-screen video · 4K · 2′20″
2023 Tianhe Ten Years Design Exhibition

> His work keeps returning to one question: when a traditional image is placed inside a new viewing apparatus, is it preserved — or consumed?

	Reincarnation	Chinese Immortals	Live Stream
MEDIUM	CG animation	VR short film	Single-screen video
METHOD	3D built and sculpted by hand	20,000-photo photogrammetry	Stage set and screen matrix
